

MARKER INK JET K2

Technical features :

- Text, graphics, barcodes, counter and variable dates
- Touch screen display on the machine
- Layout software fully compatible with UNICODE
- Counter and dates with Roman, Arabic, Asian numerals, word or characters defined by the user
- Input for labeller sensor
- Support for external sensor and encoder included
- Low ink alarm with user-definable level
- Print height 12.7mm (1/2 inch) HP head
- User-defined resolution with 60.000 dpi print direction
- Ink reduction from 0 to 50% (6 levels) to reduce printing costs
- Import files also from USB stick
- Repeat print function (1 or more prints per sensor signal)
- Infinite printing function (continuous printing while the sensor is on)
- Mounting Kit and HP Head Cleaning Set are included.

These features make the K2 Ink Jet marker ideal for insertion into packaging machines and machines where a single text / date / counter print is required, instead of inkjet markers or obsolete printing equipment. The display on the machine allows quick changes of print projects and their constant display
